WHAT CAN SHAREPOINT DO FOR YOUR BUSINESS?

Microsoft SharePoint 2010 can provide a single point in your organisation to share, manage and search all your content. Sign up for a FREE 30-day trial today!

The capabilities of SharePoint 2010 work together to help your company quickly respond to changing business needs. As a large and highly customisable business platform, Microsoft SharePoint 2010 has different functional areas that can meet many different needs. For example, it provides tools for effective collaboration, web content design/management and interaction with external data and applications to fully integrate into existing systems.

SharePoint 2010 for Developers. Development teams can build custom applications and components to rapidly respond to business needs. With familiar tools, it's easy to create Web Parts, external content types and workflow activities for use in SharePoint solutions. A full set of extensibility APIs also lets you customise your SharePoint implementations.

SharePoint 2010 for IT Professionals. Flexible deployment options let you customise the system so that people can do their jobs effectively in a secure environment. Plus, with centralised administration and management features, you can be confident knowing that you maintain control over a system that is ready to respond to any business need.

SharePoint 2010 for End Users. Work better, faster, smarter and together with a familiar Microsoft Office interface. Access the right people and information at the right time to make better decisions and get the job done.

What's more, as one of only five Microsoft Gold Learning Partners in the UK, F1 can provide professional training to help you do your work in SharePoint quickly and effectively. We can also advise you on the best Microsoft Certification for SharePoint 2010. Contact us on **01225 336096**, visit our website at www.f1comp.co.uk or email sales@f1comp.co.uk.

WORK FROM VIRTUALLY ANYWHERE AND ON ALMOST ANY DEVICE!

MICROSOFT'S NEW COLLABORATION TOOL IS SUITABLE FOR SMALL, MEDIUM OR ENTERPRISE BUSINESSES

Office 365 is a hosted online service from Microsoft that includes email and calendar, Office Web Apps, Websites and collaboration, IM and online meetings, and a 99.9% uptime guarantee.

"A common misconception about cloud services is that in order to work you need to be online... this is where Microsoft really shines... you can work on your desktop and then sync with the cloud when you are connected".

- *Andrew Gradwell, Guardian Review of Office 365.*

Officially launched on 28th June, Office 365 brings together Microsoft cloud productivity services in one highly secure, reliable and flexible package. The numerous service plans are designed to help meet your business's specific needs for robust security, reliability, and end-user productivity.

Here is an overview of the individual services that make up Office 365.

Office Professional Plus. Office Professional Plus is Microsoft's most complete productivity experience. You get the latest versions of the familiar Office applications and the Office Web Apps, freeing your people to create, communicate, and work together efficiently from virtually any device.

Exchange Online. Exchange Online offers email, calendar and contacts designed to provide your business with the control you want and the security and reliability you need. Your email is run on Microsoft's globally-redundant servers, protected by built-in antivirus and anti-spam filters and unlimited, anytime IT-level phone support.

SharePoint Online. SharePoint Online gives you a central place to share documents and information with colleagues and customers. It's easy to save documents directly to SharePoint, and work together on proposals and projects in real-time because you have access to the documents and information you need from virtually anywhere.

Lync Online. Lync Online is a next-generation cloud communications service that connects people in new ways from anywhere by using presence, instant messaging, audio/video calling, and rich online meetings with audio, video, and web conferencing. Lync Online transforms interactions with colleagues, customers, and partners from today's hit-or-miss communication to a more collaborative, engaging, and productive experience.

Office Web Apps. Office Web Apps are convenient online companions to Microsoft Word, Microsoft Excel, Microsoft PowerPoint, and Microsoft OneNote that offer you an easy way to access, view, and edit documents directly from your web browser.

"At this price, and with these management tools, Office 365 could make it hard to justify running your own Exchange server" - Mary Branscombe, PC Pro Review of Office 365.

With Plans at just £4 per user per month for small businesses and from £6.50 per user per month for medium size and enterprise organisations, any company can afford to take advantage of the business benefits Office 365 offers.

If you would like further information on Office 365 or any related training, please contact Richard Pearson on 01225 336096, or email richardp@f1comp.co.uk.

New BizTalk Server 2010 Course for Developers

Microsoft BizTalk Server 2010 helps organizations meet the challenges of integrating diverse systems. By bringing together the technologies companies require for daily operations in an agile and scalable way, BizTalk can help unleash the potential of your existing infrastructure.

A mature product on its seventh release, BizTalk Server is used by over 10,000 customers worldwide, and by 81% of the Fortune Global 100, for solutions such as payment processing, supply chain visibility, multi-channel interactions and near real-time decision-support/reporting.

Download a FREE 120-day trial of BizTalk Server 2010.

BizTalk Server 2010 supports the latest Microsoft platform technologies, including Windows Server 2008 R2, SQL Server 2008 R2, Visual Studio 2010, and the .NET Framework 4.

F1's core focus has always been on Microsoft development products, and empowering the developers we train to create amazing applications and solutions. BizTalk is a part of that, and we are the only Microsoft Learning Partner to schedule a course for BizTalk Server 2010.

For a number of years, F1's customers have been requesting the Microsoft Learning courses for BizTalk, but in an updated version. We have, in the past, done this by supplementing the existing course with information on the newest version. With BizTalk Server 2010 however, we are running a completely new course: **Developing Business Process and Integration Solutions with BizTalk Server 2010 (F1045)**.

For more information on this course, or how BizTalk Server 2010 can help your business, please contact our Sales Team on 01225 336096, or email sales@f1comp.co.uk.
